Fitchburg Gas and Electric Light Company
Docket No. D.T.E. 02-24/25
Responses to the Attorney General's Seventh Set of Information Requests**

Request No. AG-7-6 (Electric)

Please provide a list of all new industrial and large commercial customers the Company expects to provide service to during 2002 and 2003, along with the expected annual sales to each of those customers. Please also indicate any other significant incremental load from existing customers that the Company expects to provide service for during 2002 and 2003, along with the expected annual sales to each of the customers.

Response:

The Company currently (as of July 23, 2002) is aware of only one prospective industrial and large commercial customers that it expects to begin providing service to during 2002 and 2003. That prospect, a mill renovation, is estimated to have a load of 750 KVA and have annual energy requirements of about 12.5 million KWH. Present schedule calls for startup in late 2003. However, with the slowed economy, that date could likely be delayed.
